Percentage of total	10%	20%	30%	40%	50%	60%	70%	80%	90%	100%
Education and Training 7 indicators	100.0% All the 28 points: 1.5 percentage points above PCT Average, 4.1 above England Average									
Medicines Management 8 indicators	100.0% All the 36 points: 1.7 percentage points above PCT Average, 2.8 above England Average									
Patient Communication 2 indicators	100.0% All the 3 points: 1 percentage point above PCT Average, 1.4 above England Average									
Practice Management 7 indicators	100.0% All the 13.5 points: 0.6 percentage points above PCT Average, 2.1 above England Average									
Records and Information about Patients 12 indicators	96.4% 83.88 out of 87 points: 0.5 percentage points above PCT Average, 0.6 above England Average									

PATIENT EXPERIENCE DOMAIN INDICATOR GROUPS:

Percentage of total	10%	20%	30%	40%	50%	60%	70%	80%	90%	100%
Length of Consultations 1 indicator	100.0% All the 33 points: same as PCT Average, 1.7 above England Average									
Patient Survey 2 indicators	0.9% 0.55 out of 58.5 points: 56.5 percentage points below PCT Average, 55.5 below England Average									

ADDITIONAL SERVICES DOMAIN INDICATOR GROUPS:

Percentage of total	10%	20%	30%	40%	50%	60%	70%	80%	90%	100%
Cervical Screening 4 indicators	100.0% All the 22 points: 0.2 percentage points above PCT Average, 2.5 above England Average									
Child Health Surveillance 1 indicator	100.0% All the 6 points: same as PCT Average, 4.2 above England Average									
Contraceptive Services 3 indicators	89.0% 8.90 out of 10 points: 0.6 percentage points below PCT Average, 0.7 above England Average									
Maternity Services 1 indicator	100.0% All the 6 points: same as PCT Average, 1.3 above England Average									

CLINICAL PREVALENCE:

Percentage of practice list size	10%	20%	30%	40%	50%	60%	70%	80%	90%	100%
Asthma	5.37% 1.1 percentage points below PCT Average, 0.57 below England Average									
Atrial Fibrillation	1.67% 0.01 percentage points above PCT Average, 0.28 above England Average									
Cancer	1.54% 0.04 percentage points above PCT Average, 0.13 above England Average									
Cardiovascular Disease Primary Prevention	1.30% 0.73 percentage points above PCT Average, 0.68 above England Average									
Chronic Kidney Disease	2.82% 1.86 percentage points below PCT Average, 0.5 below England Average									
Chronic Obstructive Pulmonary Disease	1.69% 0.21 percentage points below PCT Average, 0.12 above England Average									
Coronary Heart Disease	4.11% 0.04 percentage points below PCT Average, 0.67 above England Average									
Dementia	0.64% 0.13 percentage points above PCT Average, 0.19 above England Average									
Diabetes Mellitus (Diabetes)	5.15% 0.34 percentage points above PCT Average, 0.89 above England Average									
Epilepsy	0.69% 0.13 percentage points above PCT Average, 0.19 above England Average									

	0.01 percentage points above PCT Average , 0.08 above England Average		
Heart Failure	0.97%		
	0.27 percentage points above PCT Average , 0.25 above England Average		
Hypertension	15.29%		
	0.14 percentage points above PCT Average , 1.93 above England Average		
Hypothyroidism	2.67%		
	0.41 percentage points below PCT Average , 0.25 below England Average		
Learning Disabilities	0.27%		
	0.1 percentage points below PCT Average , 0.06 below England Average		
Mental Health	0.49%		
	0.19 percentage points below PCT Average , 0.29 below England Average		
Obesity	9.40%		
	0.37 percentage points above PCT Average , 0.95 above England Average		
Palliative Care	0.10%		
	0.33 percentage points below PCT Average , 0.04 below England Average		
Stroke or Transient Ischaemic Attacks (TIA)	1.83%		
	0.24 percentage points below PCT Average , 0.15 above England Average		

Numbers on clinical registers are used to calculate raw disease prevalence, expressing registers as a percentage of practices' list sizes. Note, however, that five QOF registers relate to specific age groups: diabetes is patients aged 17+; epilepsy, chronic kidney disease and learning disabilities registers are patients aged 18+; and obesity is patients aged 16+. Because raw prevalence rates (registers as a percentage of total list size) underestimate prevalence for these five conditions, alternative calculations, based on estimates of appropriate age-banded list size information, are available from www.ic.nhs.uk/qof.
